Our entire hotel is Internet-wired including Grand Ballroom, Meeting Salons, Conference Rooms, and Pueblo Room with Ethernet running on Enhanced Cat-5 cabling with RJ-45 jacks. Our service is provided over our fiber optic infrastructure and routed throughout the Hotel via our Cisco® backbone.

	Daily	Event
Shared HSIA (single public IP address).....	\$250.00+	\$500.00+
Additional Public IP Address/Device (Ethernet).....	\$50.00+	\$100.00+
Dedicated 1.54 Mb Bandwidth Internet Service..... (includes 30 IP addresses)		\$2500.00+
Dedicated 5.0 Mb Bandwidth Internet Service..... (includes 60 IP addresses)		\$4000.00+
Additional 1.0 Mb throughput.....		\$1000.00+
Firewall Internet.....		\$500.00+

An Ethernet adapter (10 or 10/100 megabits) is required for each device connecting to the Hotel's network (unless wireless). If you are using an outside vendor for computers, please let the vendor know about this requirement. Our BBSM Server will automatically assign each device an IP address. Pre-configured static IP addresses on any device will need to be disabled in order for this service to function.
